PRODUCTION LINE W TYPE CANTILEVERS

Roll forming line for the production of profiles for cantilever racking shelves, intended for storing long profiles. These structures are alternatives to pallet racking, for longer profiles. Cantilever racking can be single-sided if picking is possible on one side only, and is usually positioned close to the walls; they are two-sided if picking is possible on 2 sides, with handling elements between the different aisles.

Line direction Right-Left		
Line colour	blu RAK 501	RAL
Production	6 mt/min	m/min.
Thickness	2-5 mm	mm
